Tyler Cowen's controversial New York Times bestseller—the book heard round the world that ignited a firestorm of debate and redefined the nature of America's economic malaise. America has been through the biggest financial crisis since the great Depression, unemployment numbers are frightening, media wages have been flat since the 1970s, and it is common to expect that things will get worse before they get better. Certainly, the multidecade stagnation is not yet over. How will we get out of this mess? One political party tries to increase government spending even when we have no good plan for paying for ballooning programs like Medicare and Social Security. The other party seems to think tax cuts will raise revenue and has a record of creating bigger fiscal disasters than the first. Where does this madness come from? As Cowen argues, our economy has enjoyed low-hanging fruit since the seventeenth century: free land, immigrant labor, and powerful new technologies. But during the last forty years, the low-hanging fruit started disappearing, and we started pretending it was still there. We have failed to recognize that we are at a technological plateau. The fruit trees are barer than we want to believe. That's it. That is what has gone wrong and that is why our politics is crazy. In The Great Stagnation, Cowen reveals the underlying causes of our past prosperity and how we will generate it again. This is a passionate call for a new respect of scientific innovations that benefit not

only the powerful elites, but humanity as a whole. Management principles: a contemporary edition Africa, focuses on these core management principles. It provides learners with a sound knowledge of the business environment, how to manage scarce resources, and the functions of planning, organising, leading and controlling. The book also highlights the importance of sound decision-making, information management, optimising a diverse workforce, managing different organisational cultures, managing people (individuals, groups and teams) and business ethics

Contemporary Security Management, Fourth Edition, identifies and condenses into clear language the principal functions and responsibilities for security professionals in supervisory and managerial positions. Managers will learn to understand the mission of the corporate security department and how the mission intersects with the missions of other departments. The book assists managers with the critical interactions they will have with decision makers at all levels of an organization, keeping them aware of the many corporate rules, business laws, and protocols of the industry in which the corporation operates. Coverage includes the latest trends in ethics, interviewing, liability, and security-related standards. The book provides concise information on understanding budgeting, acquisition of capital equipment, employee performance rating, delegated authority, project management, counseling, and hiring. Productivity, protection of corporate assets, and monitoring of contract services and guard force operations are also detailed, as well as how to build quality relationships with leaders of external organizations, such as police, fire and emergency response agencies, and the Department of Homeland Security. Focuses on the evolving characteristics of major security threats confronting any organization Assists aspirants for senior security positions in matching their personal expertise and interests with particular areas of security management Includes updated information on the latest trends in ethics, interviewing, liability, and security-related standards This collection of essays explores the notion, tools and challenges of human rights diplomacy. Human rights diplomacy is understood as the utilisation of diplomatic negotiation and persuasion for the specific purpose of promoting and protecting human rights. This book builds on discussions at a high-level workshop on the topic, organised by the University of Nottingham Human Rights Law Centre, the European Inter-University Centre for Human Rights and Democratisation and the Adam Mickiewicz University of Poznań, that was held in Venice. Homi K. Bhabha delivered the 2010 Hegel lecture, evoking the spirit of Hegel in an attempt to understand contemporary issues of ethical witness, historical memory and the rights and representations of minorities in the cultural sphere. Who is our neighbour today? What does hospitality mean for our times? Why is the recognition of others such an agonizing encounter with the alterity of the self? The lecture exemplifies how the "Third Space" - one of the key theories of Postcolonialism - helps us to establish a new understanding of cosmopolitanism and hospitality in a globalized world, based on the right of difference in equality. Ancillary package available upon adoption. This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Editors: Joe Perdue, CCM, CHE, and Jason Koenigsfeld, Ph.D., CHE, for the Club Managers Association of America An exploration of the visual culture of "race" through the work of five contemporary artists who came to prominence during the 1990s. Over the past two decades, artists James Luna, Fred Wilson, Amalia Mesa-Bains, Pepón Osorio, and Renée Green have had a profound impact on the meaning and practice of installation art in the United States. In Subject to Display, Jennifer González offers the first sustained analysis of their contribution, linking the history and legacy of race discourse to

innovations in contemporary art. Race, writes González, is a social discourse that has a visual history. The collection and display of bodies, images, and artifacts in museums and elsewhere is a primary means by which a nation tells the story of its past and locates the cultures of its citizens in the present. All five of the American installation artists González considers have explored the practice of putting human subjects and their cultures on display by staging elaborate dioramas or site-specific interventions in galleries and museums; in doing so, they have created powerful social commentary of the politics of space and the power of display in settings that mimic the very spaces they critique. These artists' installations have not only contributed to the transformation of contemporary art and museum culture, but also linked Latino, African American, and Native American subjects to the broader spectrum of historical colonialism, race dominance, and visual culture. From Luna's museum installation of his own body and belongings as "artifacts" and Wilson's provocative juxtapositions of museum objects to Mesa-Bains's allegorical home altars, Osorio's condensed spaces (bedrooms, living rooms; barbershops, prison cells) and Green's genealogies of cultural contact, the theoretical and critical endeavors of these artists demonstrate how race discourse is grounded in a visual technology of display.

Links are made to existing bodies of theory in the root disciplines of economics, psychology and social theory, while the challenging implications for research and future paths of inquiry are outlined and discussed. The definitive up-to-date guide to the field. Original contributions by the leading scholars of Organizational Learning and Knowledge Management world-wide. 'Must Have' reference source for all scholars in this field. What fuels long-term business success? Not operational excellence, technology breakthroughs, or new business models, but management innovation?new ways of mobilizing talent, allocating resources, and formulating strategies. Through history, management innovation has enabled companies to cross new performance thresholds and build enduring advantages. In *The Future of Management*, Gary Hamel argues that organizations need management innovation now more than ever. Why? The management paradigm of the last century?centered on control and efficiency?no longer suffices in a world where adaptability and creativity drive business success. To thrive in the future, companies must reinvent management. Hamel explains how to turn your company into a serial management innovator, revealing: The make-or-break challenges that will determine competitive success in an age of relentless, head-snapping change. The toxic effects of traditional management beliefs. The unconventional management practices generating breakthrough results in "modern management pioneers." The radical principles that will need to become part of every company's "management DNA." The steps your company can take now to build your "management advantage." Practical and profound, *The Future of*

What really sets the best managers above the rest? It's their power to build a cadre of employees who have great inner work lives—consistently positive emotions; strong motivation; and favorable perceptions of the organization, their work, and their colleagues. The worst managers undermine inner work life, often unwittingly. As Teresa Amabile and Steven Kramer explain in *The Progress Principle*, seemingly mundane workday events can make or break employees' inner work lives. But it's forward momentum in meaningful work—progress—that creates the best inner work lives. Through rigorous analysis of nearly 12,000 diary entries provided by 238 employees in 7 companies, the authors explain how managers can foster progress and enhance inner work life every day. The book shows how to remove obstacles to progress, including meaningless tasks and toxic relationships. It also explains how to activate two forces that enable progress: (1) catalysts—events that directly facilitate project work, such as clear goals and autonomy—and (2) nourishers—interpersonal events that uplift workers, including encouragement and demonstrations of respect and collegiality. Brimming with honest examples from the companies studied, *The Progress Principle* equips aspiring and seasoned leaders alike with the insights they need to

maximize their people's performance. Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

At the turn of the millennium, the disparities between rural and urban livelihoods, underdevelopment and administrative shortcomings in the Chinese countryside were increasingly seen as posing a manifest threat to social harmony and economic and political stability. At that time the term "three rural problems" (*sannong wenti*) was coined which defined the main issues of rural life that needed to be targeted by government action: agriculture (*nongye*), villages (*nongcun*) and farmers (*nongmin*). In turn, with the launch of the 11th Five-Year Plan in 2006, a pledge was made to shift the focus of developmental efforts to the long-neglected countryside, which is still home to half of the Chinese population. This book presents an analysis of adaptive local policy implementation in China in the context of the "Building of a New Socialist Countryside" (BNSC) policy framework. Based on intensive field work in four counties in Fujian, Jiangxi, Shaanxi and Zhejiang Provinces between 2008 and 2011, it offers detailed analyses

of the form and impact of county governments' strategic agency at certain stages and within certain fields of the implementation process (for example, the design of local BNSC programs, the steering of project funding, implementation and evaluation, the establishment of model villages and the management of public participation). Further, this study illustrates that BNSC is far more than the 'empty slogan' described by many observers when it was launched in 2005/2006. Instead, it has already brought about considerable shifts in terms of the process and outcomes of rural policy implementation. Altogether, the results of this research challenge existing paradigms by showing how, against the background of contemporary approaches to rural development and recent reforms initiated by the central state, local bureaucracies' strategic agency can actually push forward effective - albeit not necessarily optimal - policy implementation to some extent, which serves the interests of central authorities, local implementors and rural residents. By tying into the larger debates on China's state capacity and authoritarian adaptability, this book enriches our understanding of the inner workings of the Chinese political system. As such, it will prove invaluable to students and scholars of Chinese politics, public policy and development studies more generally.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health

Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome. Emerging methods, as well as best practices in well-used methods, in pharmacy are of great benefit to researchers, graduate students, graduate programs, residents and fellows also in other health science areas. Researchers require a text to assist in the design of experiments to address seemingly age-old problems. New interventions are needed to improve medication adherence, patients' lived experiences in health care, provider-patient relationships, and even various facets of pharmacogenomics. Advances in systems re-engineering can optimize health care practitioners' roles. Contemporary Research Methods in Pharmacy and Health Services includes multi-authored chapters by renowned experts in their field. Chapters cover examples in pharmacy, health services and others transcendent of medical care, following a standardized format, including key research points; valid and invalid assumptions; pitfalls to avoid; applications; and further inquiry. This is a valuable resource for researchers both in academia and corporate R&D, primarily in pharmacy but also in health services, and other health disciplines. Social science researchers and government scientists can also benefit from the reading. Provides multi-authored chapters by renowned experts in their field Includes examples for pharmacy and health services and others that are transcendent of medical care Covers key research points, valid and invalid assumptions, pitfalls to avoid, applications, and further inquiry Almost since the event itself in 1757, the English East India Company's victory over the forces of the nawab of Bengal and the territorial acquisitions that followed has been perceived as the moment when the British Empire in India was born. Examining the Company's political and intellectual history in the century prior to this supposed transformation, *The Company-State* rethinks this narrative and the nature of the early East India Company itself. In this book, Philip J. Stern reveals the history of a corporation concerned not simply with the bottom line but also with the science of colonial governance. Stern demonstrates how Company leadership wrestled with typical early modern problems of political authority, such as the mutual obligations of subjects and rulers; the relationships among law, economy, and sound civil and colonial society; the constitution of civic institutions ranging from tax collection and religious practice to diplomacy and warmaking; and the nature of jurisdiction and sovereignty over people, territory, and the sea. Their ideas emerged from abstract ideological, historical, and philosophical principles and from the real-world entanglements of East India Company employees and governors with a host of allies, rivals, and polyglot populations in their overseas plantations. As the Company shaped this colonial polity, it also confronted shifting definitions of state and sovereignty across Eurasia that ultimately laid the groundwork for the Company's incorporation into the British empire and state through the eighteenth century. Challenging traditional distinctions between the commercial and imperial eras in British India, as well as a colonial Atlantic world and a "trading world" of Asia, *The Company-State* offers a unique perspective on the fragmented nature of state, sovereignty, and empire in the early modern world. Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.
